PAYMENT SYSTEMS
Solutions for growing businesses.

iCT 200 Series

The smart and versatile desktop device designed for efficiency.

- The iCT 200 Series meets the highest security requirements and is PCI PTS 2.x and 3.x certified.

Designed for Merchants

- Among the world's smallest and lightest devices, the iCT 200 Series is designed for easy handling and robust daily use. The backlit keypad and color LCD display make PIN entry and menu navigation easy and intuitive. Large keys, power buzzer and visual indicators speed transactions and reduce PIN entry errors.

- Equipped with an unparalleled array of communication technologies such as high speed modem or Ethernet.

- Accept all electronic payment methods including EMV chip & PIN, magstripe and NFC/ contactless.

iCT 200 Series

iPP310 Series

Plug and play, PIN and pay – it's the fastest, most secure, easiest-to-install PIN pad on the market.

As the industry leader in payment technology, Ingenico offers solutions that maximize security and performance, while adding real value for retailers and consumers alike. In demanding retail environments, Ingenico's iPP300 series is the most convenient, most reliable payment device on the market

Proven Security

- Ingenico's industry-proven core technology ensures that the iPP310 Series delivers the ultimate in secure data transmission and application management. Fully EMV and PCI PTS V2 and V3 certified.

Compact Design

- The iPP300 Series fits neatly and cleanly into any retail environment. With a crisp LCD display and large backlit keypad with raised-symbol menu and navigation keys, customer PIN entry and option selection are convenient and confidential.

iPP310 Series

VX 520
Robust Performance that Leads and Exceeds

The VX 520 is a reliable, rugged countertop device that's built to last. It handles encryption, decryption and processing at lightning speeds thanks to its powerful processor and expandable memory. Integrated NFC capabilities support alternative payments.

Connectivity options include dial and Ethernet. A uniquely designed communication port area underneath the device keeps countertops neat and free of clutter.

Key Benefits

Fast Processing
Faster checkout speeds allow you to complete more transactions and get consumers on their way more quickly.

Easy to Use
Countertop unit is designed for easy use and includes a backlit screen and keypad for all lighting situations.

Reliable Functionality
Get more out of your investment - the VX 520 delivers performance, reliability and long-lasting functionality.

VX 520

VX 805 PIN Pad
Exceptional Innovation, Exceptional Value

VeriFone's VX 805 Contactless PIN pad provides precisely what you need, and nothing you don't. This incredibly convenient payment device allows merchants to process a range of transactions through multiple connectivity options, while offering the latest NFC technology for mobile payments. And, of course, it includes the latest security protections for total peace of mind.

Key Benefits

Stylishly Compact
The VX 805 PIN pad features a sleek contour and ergonomic design that looks as good as it feels. Intuitive ATM-style interface and large keypad deliver exceptional convenience.

Security at All Levels
Processing of all transaction types is simple and secure thanks to the latest certifications and EMV compliance.

Big Performance
With its blazing fast processor, the VX 805 PIN pad can handle even the most complex and demanding transactions in style.

VX 805 PIN Pad
